

# Hi, my name is Jeff.

I'm a *Code Security Engineering Manager* and *Chief Information Officer*. From software development to executive leadership, I have experience in more than 30 areas of industry. *We are going to make a great team. Let's talk!*

## **My Roles:**

### **Software Engineering**

*2002-2017 (15 years)*

As an Engineering Manager, Principal Architect, and Software Engineer, I have managed and led development teams for rapidly growing organizations. Comfortable in modern languages like Node.js, Golang, and Python, as well as traditional platforms like Java and C#, I love building great tools and exceptional teams.

### **Security Engineering**

*2006-2010, 2012-2017 (9 years)*

As Manager of Code Security, Application Security Architect, and Manager of Partner Relations for multiple organizations, I have worked with thousands of developers and dozens of leadership groups to establish a self-sustaining culture of secure development practices. Having filled the roles of Ethical Hacker, Penetration Tester, and Reverse Engineer, I have also delivered comprehensive application security training programs.

### **DevOps Engineering**

*2004-2014 (10 years)*

Filling the roles of Network Architect, Infrastructure Automation Architect, Site Reliability Engineer, and Data Engineer, I have designed and implemented automation solutions at a global scale. Through my experience in this field, I have also provided consultancy in Systems Performance Engineering.

### **Executive Leadership**

*2008-2010, 2012-2014, 2016-2017 (6 years)*

Serving as Founder, Chief Information Officer, and IT Director for multiple non-profit and for-profit organizations, I leverage my diverse experience to strengthen individuals and build sustainable businesses in education, technology, and manufacturing industries.
